

THE EDITORIAL UNIVERSE OF THE GREEN EMPIRE OF THE EAST AND THE WEST

News from the **EL4DEV** participatory societal engineering program

THE EL4DEV CONFEDERATION

"A rich and captivating universe for writers around the world"

The **EL4DEV Confederation** presents the characteristics of a **huge live action role-playing game / alternate reality game** inviting individuals from all over the world to **co-create a vast ecological and societal empire** unequalled in human history due to its atypical characteristics: **the Green Empire from the East and the West**. This game in which **the border between fiction and reality is deliberately imperceptible** or even **non-existent** is based on a **transmedia narrative scenario**. The design of the game goes through a very elaborate storyline; very close to that of a movie. This scenario is partly **integrated in many works of fiction** in writing project.

THE COLLECTIONS OF SHORT STORIES, NOVELS AND COMICS OF THE EMPIRE

Chronicles of the **Green Empire of the East and the West**

The stories to be created by the ghostwriters have for context **a golden age / new era (post-modern era close to ours**, since post-COVID, post global economic crisis, post social crises, and post climatic and environmental disasters) .The golden age in question was gradually established by a supranational organization made up of multiple legal entities: the "**Green Empire of the East and the West**", also known as "**The EL4DEV Confederation**". This vast societal empire was founded and is ruled by a mysterious man who has, in the eyes of the world, and unexpectedly self-proclaimed: **the Green Emperor of the East and the West**.

These **utopian-style philosophical narratives**, which can be considered as **kinds of societal outlook and a transnational political vision**, describe **an ideal and well-structured alternative society**. They plunge the reader into the heart of a new kind of empire that is at **once ecological, intellectual, artistic, spiritual and highly enterprising**, the foundations of which are **equity, justice for all and respect for the living** - An empire which, through the construction of **vertical eco-landscape plant structures** and self-managed educational agricultural garden cities all over the world, the astonishing project is to **modify the appearance of the earth and transform it into a real forest planet...** In short, they are **thrilling travel and adventure stories** (articulated around major events, flirting with the **fantastic** (because it is indeed our world which appears however fanciful and ideal) and **science fiction** (because of futuristic scenarios).The stories are lived and narrated by central characters (men or women) around whom other secondary characters revolve.
